lerman.misha@gmail.com

Tel-Aviv, Israel

Highly motivated AI-native fast self-learner who isn't afraid to ask questions. Comfortable being independent as much as being a team player. CoffeeScript lover.

Work experience

2024 - now

[Ironscales](#), Ramat Gan - *Senior Software Engineer (Application Team)*

- Led the **redesign** of the main dashboard, simplifying navigation and reducing cognitive load through a more intuitive UX. Built a persistent filtering system that preserved user context, reduced repetitive navigation, and made key product workflows faster and more efficient.
- Expanded visual regression testing from **design-system** components to full product pages by building a **Chromatic/Storybook** screenshot pipeline, increasing release confidence and catching UI regressions earlier.
- Cut production build times by 90% and HMR latency by 40% by migrating the frontend build pipeline from **Webpack** to **Rspack**.
- Standardized the styling architecture by replacing fragmented **CSS** approaches with enforced styled-components conventions, improving maintainability and consistency across the product.
- Served as a **technical interviewer**, evaluating candidate skills and contributing to hiring decisions for the engineering team.
- Created a local frontend development environment from the ground up using **Nginx/Caddy** proxy networking, automatic HTTPS, and simplified configuration, enabling faster iteration and a smoother developer experience.
- Established **AI-ready guardrails** through custom **ESLint** rules that encoded engineering standards, making AI-assisted development safer, more consistent, and easier to review.
- Championed a zero-error policy in **Sentry**, reducing alert fatigue and strengthening the reliability of production monitoring.

2021 - 2024

[Checkpoint](#), Tel-Aviv - *Frontend Developer (Renewal tool)*

- Doubled Core Web Vitals performance using **React Suspense** and code-splitting, as validated by Lighthouse.
- Enhanced build process efficiency through an upgrade to **Webpack 5** and **Vite**.
- Contributed to internal **Design System** development in conjunction with UI/UX experts.
- Implemented a mock API using **Express.js**.
- Modernized and streamlined development processes by updating **CI/CD** (Bamboo) pipelines.
- Migrated to **TanStack Query** to implement caching strategies and improve the user experience.

2020 - 2021

[1824](#), Netanya - *Full Stack Developer (Jobs portal)*

- Built a mobile-first application and admin dashboard from scratch using **Next.js**.
- Managed authentication and database operations with **Firebase Firestore**.
- Implemented **Google Functions** for cron jobs.
- Developed a REST API on **Laravel** with **MySQL**, integrated with a third-party lead system.

Freelance Developer (since 2017) | [GitHub account created in 2015](#)

Side Projects

Pi coding-agent extensions - [pi-subagentura](#) for observable sub-agent orchestration, [pi-doc-injector](#) for deterministic documentation context, and [pi-ralplan](#) for consensus-driven planning.

[Zed CSS Variables Extension](#) - Developed CSS LSP integrations in [TypeScript](#) and [Rust](#) for autocompletion, refactoring, diagnostics, and visual previews of CSS variables.

[JSX Prop Lookup MCP](#) - CLI/MCP server that gives LLMs code-aware JSX prop analysis through Abstract Syntax Tree parsing; published as an [open-source npm package](#).

[Git Search](#) - VS Code extension for in-depth Git history analysis and faster understanding of codebase changes.

[Betton](#) - Betting platform based on the TON blockchain using Next.js, Chakra UI, and Supabase.

[Homy](#) - User-friendly apartment-rental application for the Israeli market built with React Native and Expo; available on the iOS App Store.
